PREFACE

This summary reports domestic rail, boat and available truck and air shipments of fresh fruits and vegetables by commodities, origins and months. Imports taken from official records of the U. S. Department of Commerce are also reported. Exports of Arizona, California, Florida and Texas citrus are identified. Florida citrus exports were obtained from the Inspection Service. Texas citrus exports were reported by shippers. Arizona and California citrus exports were obtained from the citrus Administrative Committees.

Shipments shown in detailed tables are rail shipments,including rail-truck (piggyback) moving on initial line-haul waybills. Rail-truck is identified by the symbol R/T adjacent to State of origin. "Air" identifies air movements. Domestic truck shipments and imports are incomplete, but identified and reported where movement data were available.

Truck shipments for all commodities and origins are not available. Those obtainable are reported, but should not be interpreted to represent complete truck movements. Arizona and Florida truck represent interstate movement only. Truck reported for all other States is collected at shipping points and includes both inter and intrastate movements.

The following abbreviations were used to identify California shipments by districts: ND - Northern District; CD - Central District; SD - Southern District and IV - Imperial Valley.

Factors used to convert air, truck and boat to rail carlot equivalents are outlined on page 3.

Cooperation of railroad, air and steamship agents, and officials of State departments of agriculture and farmers' markets, as well as members of the produce industry, is gratefully acknowledged.
